~ Be Prepared ~

Preventative Maintenance Checklist

- ✓ Shield Temperature Evaluation
- ✓ Chiller Temperature and Flow Inspection
- ✓ Compressor Charge Top-off
- ✓ Absorber Replacement
- ✓ Vessel Leak Inspection

Medallion Magnet Services

is your resource for optimally maintaining your MRI's Cryo-Refrigeration System.

Helium prices are expected to rise in the near future. Insure that your system is working at 100% efficiency.

Don't wait until your magnet pressure rises, helium boils off or the cold head stops working.

Contact Medallion Magnet Services today for your preventative maintenance and peace of mind!
